Dimensions

Length: 3600 mm
Width: 2550 mm
Height: 2560 mm
Weight: 2000 kg

Productivity

30 pcs/h
Curing cycle 20 min.

Power Supply

Gas / Diesel

Tutte le macchine per Curing Section

OVEN CATENA

The curing oven with automatic doors.

Adding doors to our oven allows you to reach a far more efficient and controlled curing process. Thanks to the doors, the temperature inside the heating chamber is uniform and the airflow drastically increased.

OVEN 2000

The curing oven for productions of around 10.000 pieces a day.

The Oven 2000 is designed to automatically start once its door is closed, enabling it to reach the desired temperature rapidly. Once the selected process is over, an automatized system pulls out the air, allowing you to extract the garments after only 3-4 minutes.

LAB OVEN

The best oven for garment sampling.

The reduced dimensions of Lab Oven and its incredibly versatile use make it a model capable of excellent performances, especially for sampling.
