

## LASERTEX UNNO AGILE

### COMPACT LASER SYSTEM WITH TWO WORKING MODES CONFIGURATION

LaserTex UNNO AGILE is the most robust and optimized system in the market for higher production runs.

- High resolution 3D scanner
- Reduced size
- Double workstation
- Non-stop marking system
- High speed marking
- Safety optical barriers
- From development to production
- Two working modes configuration:

Double side position (2 operators).  
Single front position (1 operator).

- Agile set up and configuration.
- Faster handling operations.
- More productivity and profitability.

## SUCCESS STORIES

### HA-MEEM GROUP

*Faced with the challenge of sustainability and with the mission of improving the productivity of our factories, Lasertex UNNO has become the perfect partner to increase production run outputs while reducing rejection and rework percentages. This technology allows us to work for our core brands guaranteeing the necessary quality.*
